

July 23-26, 2009
San Francisco, CA

POSTER SESSION 1 - Thursday, July 23, 2009

Poster Title	Presenter	Institution
Fetal origins of Night eating syndrome?	Mr. Torsten Hero, MSc	University of Trier
Acute effects of stress reduction Interactive Guided ImagerySM (IGI) on salivary cortisol levels in overweight Latino youth	Dr. Marc J. Weigensberg, MD	Pediatrics and Preventive Medicine, University of Southern California Keck School of Medicine
Changes in insulin sensitivity and hypothalamic-pituitary-adrenal axis (HPA) activity following pilot lifestyle intervention using Interactive Guided ImagerySM (IGI) in obese Latino adolescents	Dr. Marc J. Weigensberg, MD	Pediatrics and Preventive Medicine, University of Southern California
The relationship between school stress and visceral fat: Evidence of moderation by the cortisol awakening response in peri-pubertal Hispanic girls	Mrs. Carrie Joy Donoho, MA	Department of Preventive Medicine, University of Southern California
Being lean, so why care about calories? Low Waist-to-Hip-Ratio coincides with higher comfort food intake after acute stress in an elderly healthy sample	Ms. Petra Puetz,	Centre of Psychobiological and Psychosomatic Research, Trier, Germany
Adiponectin and Negative Mood in Healthy Pre- and Post-menopausal Women	Dr. Tanja C. Adam, PhD	University of Southern California
Relationship between hypothalamic-pituitary-adrenal and food intake responses to a psychosocial stress test in middle-age, perimenopausal women of differing body composition	Raschel DeCant	Obesity and Metabolism Research Unit, Western Human Nutrition Research Center
CRH-stimulated cortisol release and food intake in healthy non-obese adults	Dr. Samir Khan	Department of Psychiatry, University of Michigan
One- and two-year stability salivary alpha-amylase diurnal rhythm and overall daily output	Dr. Nicolas Rohleder	Department of Psychology, Brandeis University

July 23-26, 2009
San Francisco, CA

POSTER SESSION 1 – Thursday, July 23, 2009

Poster Title	Presenter	Institution
Neural Memes in Epigenesis, Pathogenesis, and Longevity	Dr. Hoyle Leigh, MD	Dept. of Psychiatry, UCSF Fresno UC Berkeley-UCSF Joint Medical Program;
Associations between Telomere Length and Education in the Health ABC Study (AP07-431: The effects of psychosocial stress on telomere length)	Mr. Matthew S. Pantell	Department of Psychiatry; & Department of General Internal Medicine, University of California, San Francisco
Stress reactivity and buccal cell telomere length in 6-year old children in the Peers and Wellness Study	Dr. Candyce Kroenke, ScD	UCSF
The 5-HTTLPR modulates the impact of sex and use of oral contraceptives on the cortisol awakening response	Mrs. Eva A. Mueller, MSc	Department of Personality Psychology and Individual Differences, Justus-Liebig-University
Assessments of maternal cortisol awakening responses and diurnal cortisol profiles over a multiple-day period predict length of gestation	Dr. Sonja Entringer, PhD	Department of Psychiatry & Human Behavior, University of California, Irvine
Humor and the Cortisol Awakening Response in Older Men	Dr. Julian C. L. Lai, PhD	Department of Applied Social Studies, City University of Hong Kong, Hong Kong, China; School of Social Sciences, Humanities and Languages, University of Westminster, London, UK; Center on Behavioral Health, University of Hong Kong, Hong Kong, China
Light affects morning salivary cortisol, but not salivary alpha-amylase	Ms. Jana Strahler, PhD candidate	Department of Psychology, TU Dresden

July 23-26, 2009
San Francisco, CA

POSTER SESSION 1 – Thursday, July 23, 2009

Poster Title	Presenter	Institution
Acute relaxation-induced changes in hormones of the hypothalamic pituitary adrenal axis	Ms. Wendy Kira Wolfson, MA	Department of Psychiatry, University of California, San Francisco
Physiological and Psychological Responses to the 2008 U.S. Presidential Election	Dr. Emma Kristine Adam, PhD	Northwestern University
Measuring Cortisol in Nails: A Pilot Study in Normal Volunteers	Dr. Allan H. Young, MB ChB., MPhil, PhD, FRCPsych, FRCPC	Institute of Mental Health, Department of Psychiatry, University of British Columbia
Cognitive modulation of endocrine responses to CRH stimulation, revisited – An exercise in understanding potential sex and CBG effects	Dr. James L. Abelson, MD, PhD	Department of Psychiatry, University of Michigan
DHEAS: A new stress hormone for psychologists?	Dr. Nicole Maninger, PhD	Department of Psychiatry, University of California, San Francisco
Social evaluation and gender: impact on sex differences in stress reactivity	Ms. Annie Duchesne, Msc	Neurology Neurosurgery, Douglas Research Hospital McGill University
Sex based differences in cortisol response to psychosocial stress	Ms. Julie Andrews	Virginia Institute for Psychiatric and Behavioral Genetics, Virginia Commonwealth University
Automatic emotional information processing regulates the cortisol response to psychosocial stress	Ms. Rami Nijjar, BA	Center for Research in Human Development; Concordia University

July 23-26, 2009
San Francisco, CA

POSTER SESSION 1 - Thursday, July 23, 2009

Poster Title	Presenter	Institution
Human hormonal responses to social challenges: an experimental paradigm for a laboratory setting	Mr. Gonalo Aires Oliveira, Lic.	Instituto Superior de Psicologia Aplicada, Portugal
Mineralocorticoid receptor (MR) gene variants are functional in vitro and influence the response to psychosocial stress	Mrs. Nienke van Leeuwen	Division of Medical Pharmacology, LACDR, Leiden University
Stress Response to the Still-Face Procedure	Dr. David Haley	Department of Psychology, University of Toronto
Impact of Infant Cry Perception on Conflict Monitoring	Ms. Maireanne C Ryan	Department of Psychology, University of Toronto
Cortisol concentrations in rhesus monkey milk: Implication for offspring biobehavioral development	Dr. Erin Sullivan	Department of Psychology, University of California, Davis
Infants That Regulate Stress Learn: Cortisol Tuning in the First Year of Life	Ms. Laura A. Thompson, PhD	Psychology Department, New Mexico State University, Las Cruces, NM
Breastfeeding, Cortisol, Fear and Approach: Pieces of Developments Puzzle	Ms. Laura A. Thompson, PhD	Psychology Department, New Mexico State University, Las Cruces, NM
The maternal cortisol awakening response in human pregnancy is associated with the length of gestation	Dr. Claudia Buss, PhD	Departments of Psychiatry and Human Behavior, Obstetrics and Gynecology and Pediatrics, University of California Irvine, Irvine, USA
Neuroendocrinological effects of prenatal exposure of selective M- and N-cholinoblockers in early ontogeny	Dr. Mr. Alekber Azizovich Bairamov, MD, PhD	Ott Institute of Obstetrics and Gynecology RAMS
Early life maternal care predicts psychological vulnerability and the cortisol awakening response in young adults	Dr. Veronika Engert, PhD	Douglas Mental Health University Institute, Department of Psychiatry, McGill University

July 23-26, 2009
San Francisco, CA

POSTER SESSION 1 - Thursday, July 23, 2009

Poster Title	Presenter	Institution
Exposure to maternal depressive symptoms may alter subsequent cortisol awakening response in children but not in mothers	Dr. Louise Seguin	Universite de Montreal
Increased Cortisol in Response to Peer Interaction in Children with Autism	Dr. Blythe A. Corbett, PhD	University of California, Davis
Retaliative aggression in young men - can adult and embryonic testosterone levels explain interindividual differences?	Dr. Yvonne Kuepper	Dept. of Psychology; University of Giessen
Confounding influences on long-term electrodermal recording	Ms. Sigrun Doberenz	Stanford University
Can Attentional Manipulation Affect the Cortisol Stress Response?	Ms. Laura S. Copeland, MSc	Douglas Mental Health Institute; McGill Centre for Studies in Aging; Faculty of Medicine, McGill University
Acute effects of cortisol on memory and functional connectivity within the brain	Dr. Sarah Nicola Garfinkel, PhD	Psychiatry, University of Michigan
The prospective association between COMT genotype and cognition among black and white older adults: Findings from the Health ABC Study	Dr. Alexandra Jasmine Fiocco, PhD	Dept. of Psychiatry; University of California San Francisco
Task dependent amelioration or impairment of cognitive tasks elicited by fear.	Dr. Ora Kofman, PhD	Psychology, Ben-Gurion University of the Negev, Beer-Sheva, Israel
Mifepristone Reduces Weight Gain Associated with Risperidone Use	Dr. Joseph Belanoff, MD	Corcept Therapeutics
Next-Generation GRII Antagonist Prevents and Reverses Antipsychotic-Induced Weight Gain	Dr Robert Roe, MD	Corcept Therapeutics
